SUMMARY

Senior Android Engineer and Team Leader with 7+ years shipping production Kotlin applications to Google Play and the App Store. Built four native Android applications from scratch for the Tagway RFID platform and evolved Tagway Ice across 19 major versions, now leading its incremental migration from XML to Jetpack Compose. Works across the mobile stack, from BLE and RFID hardware integration to Kotlin Multiplatform, Flutter, Swift, and Azure-hosted backend integration, with an on-device security mindset backed by the Certified Ethical Hacker (CEH) credential. Mentors Android and iOS engineers, uses AI coding tools such as Claude Code daily, and has published 16+ technical articles on Android and Kotlin.

SKILLS

- **Languages:** Kotlin, Java, Swift, Dart, Python
- **Android:** Android SDK, Jetpack Compose (migrating), XML layouts, Material 3, Android Jetpack (Room, LiveData, View Binding, Data Binding), Coroutines and Flow (6 years), StateFlow, Hilt, NDK, Gradle product flavors
- **Cross-Platform & iOS:** Kotlin Multiplatform (KMP), Flutter, Swift, Xcode
- **Architecture:** MVVM, Clean Architecture, unidirectional state, SOLID, OOP, design patterns, custom lint rules for architectural enforcement
- **APIs, Data & Hardware:** RESTful APIs, JSON, WebSockets, OAuth2 and JWT, Azure-hosted backend integration, Firebase, Supabase, SQLite, MySQL, BLE, RFID, Zebra scanner SDK
- **Quality & Release:** unit and integration testing, Espresso UI tests, test plans, code review, GitHub Actions, Jenkins, Git, SVN, Play Console staged rollouts, Firebase Remote Config feature flags, Crashlytics, Firebase Analytics, ANR and memory-leak debugging, performance profiling
- **Security:** Android Keystore, EncryptedSharedPreferences, BiometricPrompt, R8/ProGuard obfuscation, secrets kept out of the shipped binary, mobile app pen testing, CEH
- **Leadership:** team leadership, mentoring, Agile/Scrum, design documents, API specifications, release notes, stakeholder communication, cross-functional collaboration

EXPERIENCE

Senior Android Developer / Team Leader | Tagway | Dubai, UAE (remote from Mumbai) **Oct 2018 - Present**

- Built from scratch and own end-to-end four native Kotlin Android applications for the Tagway RFID platform (Tagway Ice, Tagway Linen, Tagway Smart Tray, Tagway AMS), evolving Tagway Ice from v1 to v19 on Google Play across 2018-2024 with client-specific builds delivered through Gradle product flavors.
- Leading the incremental migration of Tagway Ice from XML layouts to Jetpack Compose on MVVM with unidirectional state (Coroutines, Flow, LiveData), Hilt, and Room, upholding architectural boundaries through custom lint rules and code review that improved code modularity and maintainability by 25%.
- Optimised performance and reliability: reduced app size from 80MB to 40MB, eliminated ANRs and memory leaks through profiling, resolved Android 14 release-blocking crashes ahead of release, and migrated native (NDK) libraries to 16KB page-size alignment for Android 15+ ahead of the Google Play deadline.
- Integrate the applications with Azure-hosted backend services over RESTful APIs secured with OAuth2 and JWT access and refresh tokens, writing API specifications with backend engineers and resolving integration issues alongside them.
- De-risk releases with Play Console staged rollouts, Firebase Remote Config feature flags, Firebase Crashlytics, Firebase Analytics, and a custom event-tracking pipeline that informs product decisions.
- Lead Android and iOS engineers and outsourced partners across Agile sprints: assigning tasks, reviewing code, mentoring, writing design documents and release notes, and communicating progress and risks to management.

PROJECTS

Tagway Ice - Android Application (Team Lead) | Kotlin, BLE/RFID, REST, Room **Jan 2025 - Present | Google Play**

- Engineered real-time BLE and REST API data sync with RFID hardware, applying design patterns and OOP principles that cut post-release bugs by 15%, backed by unit, integration, and Espresso UI tests.
- Hardened on-device security with hardware-backed Android Keystore keys, EncryptedSharedPreferences, BiometricPrompt authentication, R8/ProGuard obfuscation, and API secrets moved out of the binary into Remote Config.
- Shipped Arabic and English localisation and Firebase Cloud Messaging push notifications, and integrated a legacy Zebra scanner SDK through manufacturer-specific compatibility issues.

Tagway Ice - iOS Application (Team Lead) | Swift, Xcode, BLE/RFID **Jul 2025 - Present | App Store**

- Designed and built the native iOS application for phones and tablets, leading a team of four developers and keeping product behaviour consistent with the Android application.
- Built BLE connectivity for real-time data sync between mobile devices and RFID hardware using scalable architectural patterns, with Networking, REST, and JSON best practices.

Tagway Linen - Android Application | Kotlin, Room, RFID **Google Play**

- Built from scratch the RFID linen and uniform tracking application for laundries, hotels, and uniform providers: real-time RFID scanning through the laundry cycle, variance reporting between expected and actual inventory, and wash-cycle tracking for hygiene compliance.

Tagway Connect - Kotlin Multiplatform Client | KMP, Kotlin, WebSockets, RFID **In production**

- Built a KMP client application that pushes scanned RFID tags to connected systems over WebSockets in real time, delivered directly to customers and distributed outside the app stores.

Inventory Reporting Application | Flutter (Dart), Firebase **Jun 2020 - Dec 2020**

- Self-taught Flutter and delivered a cross-platform inventory reporting application within 6 months, with Firebase Analytics, Crashlytics, and Remote Config holding API secrets outside the binary.

OPEN SOURCE & PERSONAL PROJECTS

- **ShieldCheck** (Kotlin, Jetpack Compose, Clean Architecture, Hilt, Room): Android security and privacy auditing app that classifies app permissions by risk and checks device and network exposure.
- **PillTime** (Kotlin Multiplatform, Compose Multiplatform): fully offline medication reminder for Android and iOS.
- **BingoGame** (Compose Multiplatform, Ktor WebSockets): real-time multiplayer Bingo with an on-device WebSocket server and QR-code room joining.
- **HeapMonitor** (Kotlin): drop-in Android debug overlay showing live JVM and native heap usage and ART GC counters, distributed via JitPack.
- **MindReading** and **ChessTimerApp** (Kotlin, Compose, Material 3): two self-published apps on Google Play.
- **MapApp** (Android, Google Maps, Firebase Realtime Database): real-time location tracker with foreground-service location updates.

WRITING & TEACHING

- 16+ LinkedIn articles on Android, Kotlin, and AI tooling, including a 6-part Kotlin Coroutines series, Android 14 Broadcast Receivers, The Android Choreographer, AIDL, Dagger 2, Compose vs. XML, and Running Claude Code for Free Using NVIDIA API.
- MasterCoroutines, a 10-chapter Kotlin Coroutines guide on GitHub, and kotlin-mastery, runnable Kotlin lessons from zero to coroutines.

EDUCATION

Master's, Information Technology | University of Mumbai **2016 - 2018 | CGPA 7.7**

- Coursework: Advanced Computer Networks, Cloud Architecture, Artificial Intelligence, Database Systems, Operating Systems, Software Engineering

Bachelor's, Information Technology | University of Mumbai **2013 - 2016 | CGPA 7.4**

- Coursework: Java, Data Structures & Algorithms, Database Systems, Software Testing

CERTIFICATIONS

- **Certified Ethical Hacker (CEH)** - LinkedIn, 2025
- **Career Essentials in Generative AI** - Microsoft & LinkedIn, 2024
- **NPTEL Programming in Java** - NPTEL, 2024
- **Android App Security: A Structured Approach to Pen Testing** - LinkedIn, 2023
- **Ethical Hacking: Mobile Devices and Platforms** - LinkedIn, 2023
- **Android Enterprise Associate** - Android, 2023
- **Intermediate Kotlin for Android Developers** - LinkedIn, 2023
- **Machine Learning and AI Foundations: Recommendations** - LinkedIn, 2023
- **Learning SOLID Programming Principles** - LinkedIn, 2023
- **Introducing App Development for iOS 14** - LinkedIn, 2023
- **HackerRank Java Skill Certificate** - HackerRank, 2023
- **The Complete 2020 Flutter Development Bootcamp with Dart** - Udemy, 2020
